Allowable Subject Matter

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance:

(1) Claims 1, 9 and 17 are directed to a printer for printing received print job data, and an information processing apparatus of the same. Claims 1, 9 and 17 identify the uniquely distinct features of "date and time adjustment means for executing a date and time setting process comprising: acquiring the information processing apparatus current date and time from the time count means, acquiring an external apparatus current date and time from an external apparatus, setting the external apparatus current date and time the reference date and time in the time count means, determining a next date and time to execute the date and time setting process so that the difference between an expected date and time obtained from the external apparatus and an expected date and time obtained from the time count means is less than or equal to the allowable time, wherein the determination is based on the external apparatus current date and time, the information processing apparatus current date and time, the elapsed time, and the allowable time". The closest prior art Minowa (JP 2001-080167) teaches when a CPU 104 of a printer 101 detects it necessary to obtain time information from a host computer 150 by some reason, the CPU 104 requests the host computer 150 to transmit the present time information via an interface 102. When receiving the request, the host computer 150 obtains the present time information from a real time clock by a built-in CPU by a predetermined accuracy, and transmits the obtained time information

to the printer 101 in a form of a time set command. The CPU 104 receives the time set command and stores time information included in the time set command to a time memory region in a RAM 103; either singularly or in combination with other cited references fails to anticipate or render the above underlined limitations obvious (when used with all the claimed limitations).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
